Projects

Ping Pong Game /// 2018

Using Javascript, coded simple ping pong game onto canvas in HTML

Website Portfolio /// 2018 -> 2019

With what I have learned throughout my classes from coding in C++ to web design classes, I attempted to code my own website portfolio.

Profile

Student in the University of Houston majoring in Digital Media with emphasis on eMedia. I enjoy coding and designing using HTML and CSS, while having knowledge in other languages such as C++, JavaScript, and PHP.

On campus, I have participated in class groups where I had to either design the look of the website or logo and color scheme for the group, which has given me exposure to learning more about Digital Media and the eMedia industry. My goal is to be a web developer for a team in the Digital Media industry working and designing websites.
