WORLDVIEW MIRROR Benefits

We, at SharmaTech LLC, are excited to present to you a simple and innovative product, designed to revolutionize the driving experience. The WorldView Mirror elegantly eliminates blind spots for ALL vehicle types and allows drivers to fully enjoy their surroundings by vastly expanding their field of view. We've meticulously designed the product to be unobtrusive to the driver's view or stock setup. The WorldView Mirror installs in seconds and is even transferable from one vehicle to another. Don't waste beautiful sunsets or breathtaking landscapes anymore! Don't be caught trying to change lanes with someone tucked away in your blind spot. See it all with the WorldView Mirror. Look Up. See the World.

Sadly, in the United States alone, there are:

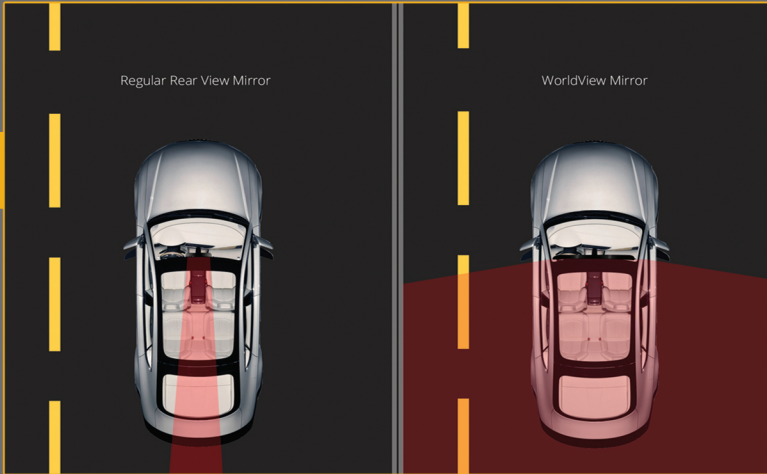

840,000 SIDE-TO-SIDE
BLIND SPOT COLLISIONS
EVERY YEAR

This should (and can) be preventable. Roughly 300 of these people lose their lives annually (and countless more are injured) because either they or drivers around them weren't aware of their surroundings. When we designed the WorldView Mirror, we wanted to help to make driving a safer experience. If even one person avoids a major collision because they used our product, we will consider our endeavor a success.

1 ELIMINATE BLIND SPOTS!

Traditional rear and side view mirrors can only see so much. There are times when a car may be hidden and thereby unnoticed. With a unified, convex mirror, your entire surroundings will always be visible for maximum utilization. Don't believe the shockingly large scope of view shown above?! Take a look at some actual views with the WorldView Mirror installed:

A MORE ENJOYABLE DRIVE!

2

When you drive, you become one with the world around you. You embrace your basic human instincts of travel and exploration. The WorldView Mirror allows drivers to fully enjoy their surroundings, truly experiencing the scenic views that come with the ride.

Sunsets, landscapes, city views- it's all there for your delight!

3

CHECK ON PASSENGERS!

Driving at just 65 miles per hour, your car travels more than 95 feet EVERY SECOND. Each time you turn to the back seats to check on your kids, you're taking your eyes off the road. Now you can monitor your children while keeping your head facing forward, thereby keeping everyone safer!

UNOBTRUSIVE AND INTERCHANGEABLE USAGE!

4

The WorldView Mirror has gone through an extensive design process. We wanted to make sure the product was simple to install and unobtrusive. With this final work-up, we've made it possible for the mirror to be installed in seconds, without interfering with your original rear-view mirror, and still allowing your visors to work perfectly.

OPTIMIZED DESIGN!

6

After viability testing, we found a 1" arc to be the perfect curvature, maximizing peripheral vision without distorting any of the reflected objects. The internally-housed support rods provide reinforcement while staying out of sight.

EXUDE ELEGANCE!

7

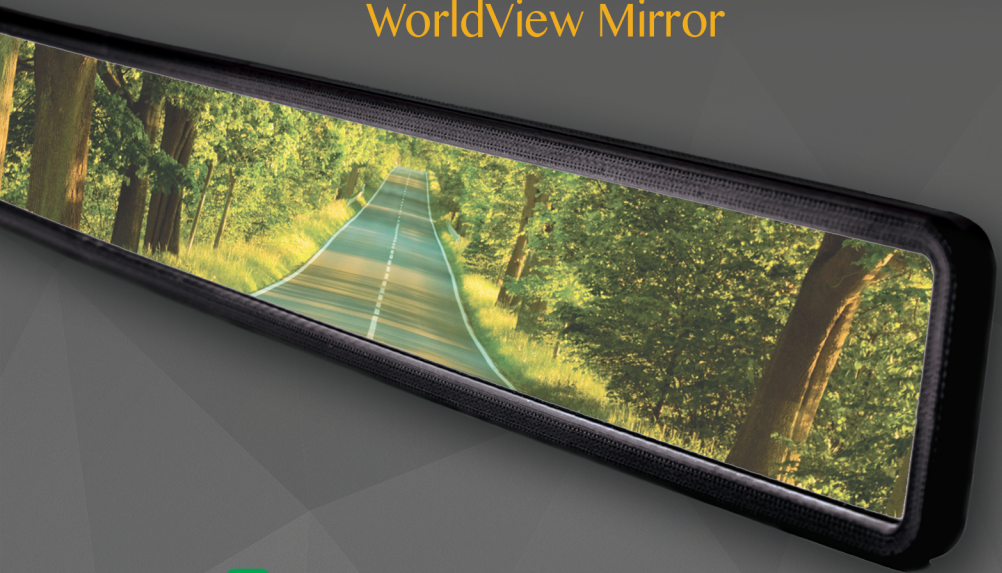

Despite all the benefits that come from using the WorldView Mirror, we knew that above all the product had to look and feel good. With a streamlined design that fits stylishly in any vehicle, the WorldView Mirror adds a new level of beauty to your ride!
