THOMAS MARTINEZ
DESIGNER & DEVELOPER

PROFILE

I am a hard working and driven designer and developer who is experienced in creating, coding, testing, and maintaining projects. I am also skilled in all stages of developing web pages. This consists of working with multiple departments to utilize the value of content, wire frame the page layout, then design and code the mockup. I can provide leadership, graphics, and programming to achieve optimal user friendly websites, applications, and marketing material.
